

BEAM CLAMP RIGGING ROLLER

BCR Series - Pipe Rollers & Rotators

Pipe rack rigging rollers play a crucial role in industrial settings such as refineries and power plants. They safeguard external coatings, Reduce drag & Improve worker safety by minimizing pinch points. Additionally, these rollers can decrease crane operation time by 20–40% and significantly enhance the efficiency of loading pipes onto systems and racks.

Key Features

- **Robust Design:** The BCR Series beam clamp rollers are crafted to ensure secure pipe installations even in challenging terrains. They come with protective coatings that minimize drag, guaranteeing smooth and reliable operations.
- **Enhanced Loading Speed:** The system allows for the streamlined loading of modular pipes, which keeps projects on track and boosts operational efficiency.
- **Optimized Efficiency:** These precision-engineered rollers enhance pipe handling, significantly saving time and resources.
- **Superior Safety:** The design prioritizes the safe maneuvering of heavy materials, maintaining productivity while ensuring worker safety.
- **Unmatched Reliability:** With durable construction, these rollers consistently deliver top-notch performance, even in the most demanding site conditions.

Technical Specification

Model	BCR 0424.05	BCR 0424.10	BCR 0436.05	BCR 0424.10	BCR 0448.05	BCR 0448.10
Pipe Diameter Range	04-24 Inch		04-36 Inch		04-48 Inch	
Load Capacity (Ton)	5	10	5	10	5	10
Rollers	Rollers Coated with special grade EUFLO59AL Heavy Durable Shore hardness 95 A, Origin – Australia / Germany.					
No of Rollers	2					
Flange Width Range - mm	150 -305					
Dimension - Inch	24x14x8.5	24x14x8.5	32x16x10	32x16x10	36x16x10	36x16x10
Finishing	Frames Ral Powder coating
