

# PIPE CHOKER BELTS-STEEL LINE

Liftec chokers are designed to support pipes and pipeline lifting machineries. The chokers hold the pipe section firmly in place, does not slip and allows the pipe to be handled, pushed and pulled more accurately and freely with the slings. Wire rope slings for the lifting can be replaced by textile slings if it is necessary to lighten the lifting device or by chain slings for a more flexible use.

## FEATURES

- Adjustable for Coating Thicknesses :** Fully adjustable to accommodate various coating thicknesses, ensuring a precise fit around the pipe.
- Safety and Ease of Use :** Designed for safe and easy handling during bending and welding operations.
- Excellent Durability :** Constructed with high-quality materials for long-lasting performance.
- Size Range :** Available in sizes from 6" to 48" to suit different pipe dimensions.
- Efficient Handling :** Facilitates fast pulling and lifting of pipes, making it ideal for bending tasks.
- Field Repairable :** Easily repairable on-site, extending its service life.
- Secure Grip :** The wide, steel-lined fabric tightly grips the pipe, preventing slippage and ensuring precise alignment.
- Convenient :** Easy to use, store, and transport, enhancing operational efficiency.
- Damage Prevention :** Allows for rolling, pulling, and securing pipes, including extreme bends, without causing damage.

This belt is an essential tool for professionals needing reliable and efficient pipe handling solutions, providing excellent performance and ease of use across a variety of tasks.
