

PIPE LOWERING BELT

The Heavy-Duty Lowering-In Belt is a robust and dependable tool specifically engineered for the safe handling and lowering of pipes during pipeline construction and installation. Crafted from heavy-duty nylon webbing, this belt provides exceptional strength, flexibility, and resistance to harsh environmental conditions. The incorporation of alloy steel end irons enhances its overall strength while maintaining a manageable weight, making it well-suited for diverse pipeline applications across the globe.

MODEL : PLB 40

FEATURES

Heavy Duty : Nylon Webbing Provides superior durability and strength for lifting and lowering heavy pipes.

Alloy Steel End Irons : Engineered for greater strength with reduced weight, ensuring ease of handling and long- term reliability.

Head Iron Included : Designed for secure attachment, painted green by default but available in custom colors upon request.

Customizable Sizes: Available in various widths and lengths to meet specific project needs.

Easy Maintenance: Requires minimal upkeep, ensuring long-term usability.

Dynamic Load-Bearing Capability: Unique damping properties yield exceptional dynamic load-bearing strength and remarkable performance.

Certification: Our lowering belts meet all applicable international standards and are supplied with TUV certification.

Size Range Versatility: Available in sizes ranging from 6" to 68".

These features make Liftec Pipe Lowering Cradles reliable and efficient tools for various pipe handling needs.

Local After Sales Support:

Accessible local aftersales service that extends the lifespan of your products.
