

FIT UP CLAMPS

PIPE WELDING CLAMP

This classic high-low alignment clamp design has been utilized globally for years. Featuring a durable yet cost-effective fabricated construction, the PDQ pipe clamps accommodate pipes up to 14 inches in diameter and are available in three sizes.

Are you working with stainless steel? The new BestFit pipe clamps are specifically designed for use with stainless steel, requiring no additional accessories. The stainless steel feet and balls in the wing nuts effectively prevent contamination of the pipe.

Product Features

- Available in three sizes suitable for 1" to 14" pipe fit-up.
- Reliable ACME-thread design, proven effective in the field for years.
- Lightweight construction makes it ideal for overhead tasks.
- Equipped with stainless steel contact points, making it ready for exotic pipe fabrication right out of the box.
- Versatile enough for various fit-ups, including pipe to pipe, pipe to elbow, and pipe to flange, among others.
- The most cost-effective yet durable high-low fit-up clamp available on the market.
