

## ADJUSTABLE INCLINE ROLLER/ PIPE ROTATORS

We offer a diverse range of pipe rotators designed for precise rotation of large, offset loads during pipe spooling and welding. BESTFIT Rotators stabilize and rotate heavy cylindrical objects, featuring adjustable turning rolls for secure positioning.

### Key Features

- Stable and consistent turning speed
- Sizes available from 2" and above
- Minimizes damage risk
- Strong, durable construction
- Superior finishing
- User-friendly operation and storage
- Ideal for heavy use.

### Technical Specification

MODEL NO	PIPE SIZE (Inches)	CAPACITY (Ton)	DIMENSION (LxWxH)MM	WEIGHT (Kg)
PRR 0630	6"-30"	5	36x18x18	170

**Rollers** : PU Grade : Rollers Coated with special grade EUFLO59AL Heavy Durable Shore hardness 95 A, Origin – Australia / Germany.

### Note:

All sizes with different capacities will be specially designed and manufactured according to the specific requirements of the project.
